STATEMENT OF WORK FOR THE

Repair of the GRID COMPUTER for the AN/MSC-63A NSN: 7021-01-372-1175

- 1.0 <u>SCOPE</u>. This document contains requirements to restore the Grid Computer for the AN/MSC-63A, NSN 7021-01-372-1175, Part Number 7036869-503, CAGE 62111 to Condition Code "A". Condition Code "A" is defined as "serviceable/issueable without qualification, new, used, repaired or reconditioned materiel, which is serviceable and issueable to all customers without limitation or restriction, including materiel with more than 6 months shelf-life remaining".
- 1.1 This Statement of Work (SOW) identifies the work effort including repair, testing, and packaging/marking requirements that shall be performed by the Contractor to rebuild the Grid Computer for the AN/MSC-63A, NSN 7021-01-372-1175, Part Number 7036869-503, CAGE 62111.
- 2.0 <u>Applicable Documents</u>. The following documents form a part of this SOW to the extent specified. Unless otherwise specified, the issues of these documents are those listed in the Department of Defense Index of Specifications and Standards (DoDISS) and supplement thereto which is in effect on the date of solicitation. In the event of conflict between the documents referenced herein and the contents of this SOW, the contents of this SOW shall be the superseding requirement.

2.1 Military Standards

MIL-STD-129 DoD Standard Practice for Military Marking

MIL-STD-2073-1C DoD Standard Practice for Military Packaging

Military Standards (Guidance Only)

MIL-STD-973 Configuration Management

2.2 <u>Military Specifications</u>

MIL-C-81309 Corrosion Preventive Compounds, Water

Displacing, Ultra Thin Film

DoD 4000.25-1-M MILSTRIP Manual

NAVICPINST 4491.2A NAVICP Instruction Requisitioning of Contractor

Furnished material from the Federal Supply System

2.3 Other Government Documents and Publications

TM-07737B-24&P/3 System Organizational and Intermediate

Maintenance Manual with Parts List for the Communications Central AN/MSC-63A

2.4 Industry Standards

ANSI/EIA-625 Requirements for Handling Electrostatic-Discharge

Sensitive ESDS Devices

ANSI/ISO/ASQC Q9003-1994 Quality Systems – Model for Quality Assurance in

Final Inspection and Test

Copies of Military Specifications and Standards are available from the DoD Single Stock Point, Defense Automation Production Service Philadelphia, Building 4D, 700 Robbins Avenue, Philadelphia, PA 19111-5094, commercial telephone number (215) 697-2179 or DSN 442-2179 or on the internet at http://www.dodssp.daps.mil. Copies of other government documents and publications required by contractors in connection with specific SOW requirements shall be obtained through the Contracting Officer: Commander, Attn: Contracting Officer (Code 891), Marine Corps Logistics Bases, 814 Radford Blvd., Albany, Georgia 31704-1128, commercial telephone number (912) 439-6761 or DSN 567-6761. Copies of engineering drawings, if applicable, shall be obtained from Life Cycle Management Center, Attn: Code 825-3, 814 Radford Blvd. Suite 20320, Albany, Georgia 31704-0320, commercial telephone number (912) 439-6410 or DSN 567-6410.

3.0 Requirements

- 3.1 <u>General Tasks</u>. In fulfilling the specified requirements, the Contractor shall provide materials, labor, equipment, facilities and missing/repair parts, necessary to inspect, diagnose, restore, and test and calibrate the Grid Computer. Upon completion of the repair, the subject item shall be in Condition Code "A".
- 3.2 Detail Tasks. The following tasks describe the different phases for repair of the GC:

Phase I Pre-Induction

Phase II Repair

Phase III Inspection, Testing and Acceptance

Phase IV Packaging, Handling, Storage and Transportation (PHST&T)

3.2.1 <u>Phase I (Pre-Induction)</u>. A pre-induction inspection analysis shall be performed for each Grid Computer within 5 working days of induction into the Contractor's facility. If repair is not feasible, assign Condition Code "H" (CC "H"), notify Marine Corps Logistics Base (Code 847-3), Albany, Georgia for disposition instructions, otherwise assign CC "M" and induct into the repair cycle. The Pre-induction Checklist which consists of Report DA-2404 (Appendix A) and Standard Form 364 (Appendix B), shall be used to report all anomalies and shall be provided to the government in accordance with section 4.0 of this SOW.

3.2.2 <u>Phase II (Repair)</u>. After pre-induction tests and inspections have been completed, repair of the Grid Computer shall be accomplished in accordance with this SOW. Deficiencies noted on the Pre-Induction Checklist during Phase I shall be repaired/replaced. Components or assemblies shall not be disassembled for replacement of parts unless that part has failed, or the component assembly wherein the part is located is disassembled for repair. Incorporate all current Engineering Change Proposals (ECPs) and Modification Instructions (MIs).

a. Hardware

- (1) Replace broken, unserviceable and/or missing hardware including nuts, bolts, screws, washers, turnlock fasteners, mandatory replacement items, safety, and one-time use items. Unserviceable would include any of the above that failed to function properly.
- (2) Ensure proper hardware locking devices are present on all moving mechanical assemblies.
- (3) Hardware normally supplied with commercial parts shall be used unless specifically prohibited.
- b. <u>Publications and Documentation</u>. The Contractor shall use appropriate technical documentation to restore the Grid Computer to Condition Code "A".
 - c. The following Standards and Publications shall be used to assist the Contractor:

MIL-C-81309 Corrosion Preventive Compounds, Water Displacing, Ultra

Thin Film

TM-07737B-24&P/3 System Organizational and Intermediate Maintenance

Manual with Parts List for the Communications Central

AN/MSC-63A

3.2.3 Phase III (Inspection. Testing and Acceptance)

- a. Inspection, Testing and Acceptance of the Grid Computer shall be conducted in accordance with MIL-C-81309, TM-07737B-24&P/3 and documentation retained by the manufacturer.
- b. The Contractor shall be responsible for conducting required tests in accordance with applicable procedures and specifications.
- c. The Contractor shall be responsible for correcting any deficiencies identified during inspection/testing. MCLB (Code 847-3), Albany, GA representatives may require the Contractor to repeat tests or portions thereof, if the original tests fail to demonstrate compliance with this SOW.

3.2.4 Phase IV (Packaging, Handling, Storage and Transportation (PHS&T)

- a. The Contractor shall be responsible for preservation and packaging of items being repaired under the terms of this statement of work. Items being prepared for long term storage or shipment to overseas destinations shall be preserved and packaged in accordance with level "A" requirements of MIL-STD-2073-1C, Appendix A, Table A.VI., Electronic Equipment. Items being prepared for domestic shipment and immediate use shall be to level "B" requirements. All items subject to electrostatic sensitive discharge shall be packed into a reusable fast pack container.
 - b. Marking of all items shall be in accordance with MIL-STD-129.
- c. The Marine Corps will provide the Contractor with the shipping address(es) for delivery of the repaired equipment. The Contractor shall be responsible for arranging for shipment to the pre-designated site(s). The Marine Corps will be responsible for transportation costs associated with shipping the subject equipment to and from the Contractor.
- Government Furnished Equipment (GFE)/Government Furnished Materiel (GFM). GFE is government owned equipment authorized by contract for use by a commercial/government contractor. It is neither consumed during the production nor incorporated into any product. GFM is materiel furnished to a contractor that will be consumed during the course of production or incorporated into product being manufactured/remanufactured under a contract/statement of work. In the event the Marine Corps does have GFE/GFM requirements, the Management Control Activity (MCA/Code 827-2), Marine Corps Logistics Bases, Albany, Georgia, will coordinate required GFE and will maintain a central control on Marine Corps assets in the Contractor's possession. The MCA will forward a GFE Accountability agreement to the Contractor Facility for signature to establish a chain of custody and property responsibilities for Marine Corps assets. The Contractor shall report receipt of all GFM and report consumption of GFM to the MCA.
- 3.4 <u>Configuration Control</u>. The Contractor shall apply configuration control procedures to established configuration items. The Contractor shall not implement configuration changes to an item's documented performance or design characteristics without prior written authorization from the Weapon System/Equipment Manager (Code 847-3). If it is necessary to temporarily depart from the authorized configuration, the contractor shall prepare and submit a Request for Deviation/Request for Waiver. MIL-STD-973 (paragraph 5.4.3 or 5.4.4 and Appendix E) may be used as a guide.
- 3.5 <u>Contractor Furnished Materiel</u>. The Marine Corps has adopted the Navy's procedures regarding Contractor Furnished Materiel (NAVICPINST 4491.2A). In the event Contractor Furnished Materiel is required for repair parts, the contractor shall requisition through the DoD Supply System. DoD 4000.25-1-M, (MILSTRIP) Chapter 11 authorizes contractors to requisition through the DoD Supply System.

- 3.6 <u>Electrostatic Discharge (ESD) Control Program</u>. The Contractor shall establish, implement and document an ESD control program following the guidelines provided in ANSI/EIA-625. ESD protective measures shall be used during manufacturing, handling, inspection, test, marking, packaging, storing and transporting ESD sensitive components.
- 3.7 Quality Assurance Provisions. The Contractor shall provide and maintain a quality system that as a minimum, adheres to the requirements of ANSI/ISO/ASQC Q9003-1994, Quality System Model for Quality Assurance in Final Inspection and Test. The program shall ensure quality throughout all areas to include fabrication, processing, assembly, inspection, test, maintenance, and preparation for delivery and shipping. Unless otherwise specified in the contract, the contractor shall be responsible for performance of all inspection requirements. The Government reserves the right to perform any of the inspections set forth in the contract where such inspections are deemed necessary to assure products and services conform to the prescribed requirements.
- 3.8 Acceptance. The performance of the Contractor and the quality of work delivered, including all equipment furnished and documentation written or compiled, shall be subject to inprocess review and inspection during performance. Inspection may be accomplished in-plant or at any work site or location, and Marine Corps representatives shall be permitted to observe the work or to conduct an inspection.
- 3.9 <u>Rejection</u>. Failure to comply with any of the specified requirements listed herein shall be reason for rejection by MCLB Code 847-3, Albany, representative. The Contractor shall, at no additional cost to MCLB, Albany, Georgia, correct the deficiencies and repeat the verification until an acceptable compliance with acceptance test procedures is demonstrated.

4.0 Reports

- 4.1 <u>Pre-Induction Checklist</u>. The Contractor shall complete the Pre-Induction Inspection Checklist (Appendix A and Appendix B) for each Grid Computer repaired. These documents shall be available prior to final acceptance testing. One copy of each document shall be provided to MCLB (Code 847-3) Albany, Georgia, after final acceptance of the Grid Computer.
- 4.2 <u>Repairable Item Inspection Report</u>. The Contractor shall provide a Repairable Item Inspection Report for each Grid Computer. The report shall be identified by United States Marine Corps Serial Number.
- 4.3 <u>Monthly Progress Reports</u>. The Contractor shall provide Monthly Progress Reports summarizing the progress and status of the Grid Computer Program.
